

Recommendation Letter

This Recommendation Letter will be awarded to Zamirbek uulu Amantur , a 2<sup>nd</sup> year student of Ala-Too International University. I have known Amantur for 2 years now and I can say that he is open to learning. I attended my introduction to programming, object-oriented programming and applied mathematics software classes in Engineering and Informatics faculty.

At the time of enrollment, Amantur level of English was low, as the courses are taught in English at International Ala-Too University, he got trouble in my classes but from the day of my offer, he began to learn English and in 3-4 months he reached the level of fluency in English. At that time, I was sure that he's openness to education would help him gain knowledge quickly.

Amantur is proficient in the Kyrgyz traditions, customs, culture, history, and national values. He is an active participant in the competition in chess among university students and Toguz korgool sports (Kyrgyz national game) competitions. He is particularly interested in Computer Science, English Language, History, Geography, and Physical Education. The achievements of his indicate that he is not indifferent to the future and growth of the country. I am sure that if this student who is constantly striving for self-development in education will join the young cadres in the country, it will benefit Kyrgyzstan. I can recommend Amantur Zamirbek uulu to study abroad at universities in Italy. I can give you more detailed information about Amantur. My contact information is indicated below.

Respectfully,

Zhumaniaz Mamataliev

Head of Applied Mathematics and Informatics department
